Buurtenergie

With **TROEF Buurtenergie** we connect houses with solar panels to houses without solar panels. This enables more sustainable energy to be exchanged in the neighbourhood. To do this, we use the energy that is normally supplied back to the existing energy grid.

Gain insight into the efficient use of energy at your house and in the neighbourhood

By using locally generated energy at a local level, you are ensured that your used energy is sustainable. In addition, the grid operator has to adjust the energy grid in fewer places. These benefits will lead to a lower energy bill in the future. The use and exchange of local sustainable energy is beneficial for houses with and without solar panels. TROEF Buurtenergie therefore gives insight into the moments that you can best use energy in your house.

The TROEF Buurtenergie dashboard gives you actual insight into when you use energy, where your used energy comes from and where your generated energy goes. This allows you to deal more efficiently with the energy in your house and in the neighbourhood.

Discover various options to make **your house** and the neighbourhood more sustainable

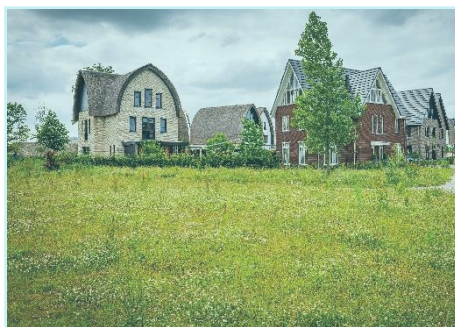

At TROEF Buurtenergie we discover, together with you, what the needs and possibilities are to make your house and the neighbourhood more sustainable. We can investigate whether it is possible to install a neighbourhood battery, which makes it possible to store locally produced energy in

the neighbourhood. Or how you can get the most out of your heat pump, through the right settings or by smartly controlling your heat pump, which ensures that energy is used when it is widely available.

Contribute to creating a **safe, green and calm** neighbourhood

Within TROEF Buurtenergie you will have the opportunity to play the TROEF Buurtenergie game. In this game you can easily collect points by using your energy in a sustainable manner. You can spend these points together with your neighbours on something that contributes to the neighbourhood. Together you decide what you want to save for.

On **Thursday 12 May** we are organizing an information meeting for the residents of Quatrebras Quartier I. You can visit the information centre of Quatrebras above Q-beach between 18.00 and 21.00.

During this walk-in evening we would like to tell you more about TROEF Buurtenergie, the exchange of energy with your neighbours and about the options for making your house more sustainable. We are happy to answer all your questions.

Do you already have a question? Send a message to troefbuurtenergie@bam.com

Or go to <https://www.troef-energy.nl/en/residential/troef-buurtenergie>. Here you can register for TROEF Buurtenergie until May 20th.
